Ridhi Kadam

925-860-8499 | ridhi_kadam@berkeley.edu | linkedin.com/in/ridhi-kadam

EDUCATION

University of California, Berkeley Graduation Date: May 2028

B.A. Data Science & Economics, Domain Emphasis in Business and Industrial Analytics.

Relevant Coursework: Decision Making and Management**,** Data Mining and Analytics, Statistics, Computational Structures in Data Science, Computer Programming, Data Structures, Microeconomics, Macroeconomics, Human Context and Data Ethics

PROFESSIONAL EXPERIENCE

National Geographic | Berkeley, CA *August 2026 - Present*

Machine Learning Engineer (Contract)

- Spearheaded **product roadmapping** and **PRD** development for a marine biodiversity **classification ML model**, using VLMs and clustering pipelines (DBSCAN, K-Means) to analyze 500+ hours of footage with 92% detection accuracy.
- Identified manual inefficiencies from user stories, developing an ML clustering tool to categorize 400+ marine species.
- Drove **UI prototyping** and workflow optimization using Lovable, streamlining pipelines to cut labeling time by 40%.

Valley Consulting Group | Berkeley, CA *August 2025 - Present*

Senior Technical Consultant

- Led consumer **product initiatives** from concept through execution for Fortune 500s including Qualcomm and Amazon.
- Conducted competitive analysis through **lean six sigma** framework to spearhead expansion and **feature prioritization**.
- Collaborated in cross-functional teams, turning analytics into **Figma** presentations for stakeholder recommendations.

Nue.io | Berkeley, CA *January 2026 - May 2026*

Product Engineer Intern (Contract)

- Built **MCP** server to convert natural-language pricing into deployable JavaScript plugins, cutting processing time by 85%.
- Integrated an **AI agent** into Salesforce CPQ and conducted **A/B tests** to improve pricing workflow and reliability.
- Created monitoring systems, using **Kanban** and **Jira** to track system performance, edge cases, and product improvements.

WestEd | San Francisco, CA *January 2026 - May 2026*

Data Engineer Analyst (Contract)

- Built **RAG** retrieval systems for administrative assessment content, boosting the efficiency of generative AI workflows.
- Led product design of a serverless AI pipeline, utilizing **AWS API Gateway** and **Lambda**, partnering with engineering to transform educational PDFs into queryable vector knowledge bases, increasing output **efficiency by 50%+**.

PERSONAL PROJECTS

SmartClinical: Predictive Analytics Allocation Model | 2nd Place in UC Berkeley Datathon *November 2025*

Berkeley, CA

- Built a **Random Forest** classifier to predict patient risk from clinical data and allocate hospital resources in real-time.
- Created a **Tableau** visualization dashboard to display resource allocation constraints and track hospital **KPIs**.
- Conducted iterative **SQL analysis** across data workflows for user-centric recommendations on product scalability.

SatherSense: An Indoor Navigation System | 1st Place at SodaHacks *March 2026*

Berkeley, CA

- Built indoor navigation app for visually impaired Berkeley students with React Native, Expo, TypeScript, Cursor stack.
- Modeled building layouts as node-edge graphs, applying optimal algorithms to improve user ease when navigating.
- Developed an **optical character recognition** pipeline to convert live camera input into navigation decisions.

AWARDS

UC Berkeley Datathon for Social Good (2nd Place), International DECA Conference for Professional Selling (3rd Place), Professional Selling Event DECA States Conference (1st Place), UC Berkeley SodaHacks Hackathon (1st Place)

SKILLS & INTERESTS

Frameworks/Tools: Tableau, Figma, Jira, A/B Testing, Microsoft Azure, Excel, Agile, Power BI, Claude, Cursor, CAD
ML/Data: Python, SQL, OpenCV, TensorFlow, Scikit-learn, JavaScript, Pandas, NumPy, Java, RAG, MCP, Matplotlib
Interests: Hiking, Reading Thrillers (*Book Reviews Blog)*, Electric Guitar, Traveling, Volunteering, Chess
